Campus to Corporate Curriculum

Year 1 - Year 2

MBA, MCA

CAMPUS TO CORPORATE - SOFT SKILLS FOR MBA & MCA

Comprehensive soft skills development programs for all MBA & MCA students to ensure:

- ✓ Complete industry and interview readiness
- ✓ Strong professional profile building
- ✓ Effective networking skills
- ✓ Interview and workplace preparedness

YEAR 1, SEMESTER 1

MBA & MCA : Soft Skills That Power Career Readiness
Choose BOTH Programs for complete corporate readiness

Training Program	Training Duration	Best Suited For
Business Communication	20 Hours	All PG Students
Profile Building & Personal Branding	20 Hours	All PG Students

YEAR 2, SEMESTER 4

MBA & MCA: Soft Skills That Power Career Readiness
Choose BOTH Programs for complete corporate readiness

Training Program	Training Duration	Best Suited For
Aptitude & Business Reasoning	20 Hours	All PG Students
Campus to Corporate (Interview skills , GD & Mock Interviews)	20 Hours	All PG Students

MBA & MCA Year 1 - Semester 1

Recommended for all Groups

Business Communication (20 hours)

✓ Communication Skills

- AI for Business communication
- Write professional emails and memos
- Draft client and internal messages
- Polish tone, grammar, and clarity
- Writing Business Reports

✓ Business Documentation

- Create SOPs, templates & checklists
- Creating JDs & policies
- Draft business plans or proposals
- Data Summaries and Reports
- Generate creative content

✓ Effective Presentation

- Public Speaking
- Body Language & Voice Modulation
- Creating pitch decks

Personal Branding Workshop (20 hours)

✓ Personal Branding

- Profile Building
- ATS compliant resumes
- Tailored job applications
- Optimized LinkedIn Profile
- LinkedIn Networking

MBA & MCA Year 2 - Semester 4

Recommended for all Groups

Campus to Corporate (20 hours)

✓ Corporate Readiness

- Interview Preparation Techniques - HR and Technical
- Positive Body Language
- Mock Interview Sessions - HR and Technical
- Group discussions

Aptitude and Logical Reasoning (20 Hours)

✓ Quantitative Aptitude and Logical Reasoning

- Number System, HCF & LCM, Averages
- Profit & Loss, SI & CI, Boats
- Percentages, Areas, Partnership
- Ages, Speed & Distance, Time & Work
- Blood Relations, Coding, Series

CAMPUS TO CORPORATE - TECHNICAL SKILLS FOR MBA

Aligned with Karnataka University curriculum
Hands-on job-oriented certification programs

YEAR 2, SEMESTER 2

MBA: Technical Skills >> Placement Role Mapping Choose Any ONE Program

Training Program	Training Duration	Roles Students can Target
Data Analytics with Excel	30 Hours	Finance / Accounting / Business Analytics / Data Analytics / Marketing / HR / Sales/ Logistics / Operations / Supply Chain Roles
ERP (Tally/Zoho) and GST	40 Hours	Finance / Accounting / Business Analytics / Data Analytics / Marketing / HR / Sales/ Logistics / Operations / Supply Chain Roles
Digital Marketing	30 Hours	Marketing / Sales / Business Development / Digital Marketing / Content Creation / Lead Generation / Branding Roles
AI Tools & Automation in Business	10 Hours	All Roles

YEAR 2 – SEMESTER 3

MBA: Technical Skills >> Placement Role Mapping Choose ANY ONE Program

Training Program	Training Duration	Roles Students can Target
Data Analytics with Power BI	40 Hours	Financial Analyst (FP&A) / Business Analyst / Data Analyst / HR Analytics / Sales Analyst / Supply Chain Analyst / Credit & Risk Analyst / Operations Analyst
Python for Business	30 Hours	Financial Analyst (FP&A) / Business Analyst / Data Analyst / HR Analytics / Sales Analyst / Supply Chain Analyst / Product Analyst / Operations Analyst / Growth Analyst
Sales Force CRM	40 Hours	All Roles
CRM Tools and Email Automation	10 Hours	Sales Analyst / Business Development Executive / Marketing Executive / Customer Support / Lead Generation & Management / CRM Analyst

Data Analytics with Excel (30 Hours)

Recommended for Business Analytics, Finance, Operations students

✓ Data Handling & Cleaning

- Importing and structuring business datasets
- Sorting, filtering, and organizing functional data
- Using text, date, and data-cleaning functions
- Handling missing values and duplicates
- Conditional formatting & performance KPIs

✓ Formulas & Functions

- Logical and lookup functions
- Advanced formulas for business decisions
- Applying functions- HR, sales, expenses etc.
- Text and date formulas for reports
- Formulas for multi-criteria analysis

✓ Data Analysis & Visualization

- PivotTables-HR, Marketing, Finance data etc.
- Advanced Pivot features
- Power Query for transforming datasets
- Building function-specific dashboards (HR analytics, sales trends, cost analysis etc.)
- Visual storytelling and management reports

✓ Automation & Reporting with Macros

- Recording & running macros
- VBA scripting for automation & data processing
- Automating reports, charts, and dashboards
- Creating custom forms & action buttons

✓ Project: Interactive Dashboard

ERP Software (Tally / Zoho Books) and GST (40 Hours)

Recommended for all MBA Students

✓ ERP Software & Modules

- Overview of ERP systems and key features
- Setting up organizational structure in ERP
- Managing transactions across functions
- Integration of Finance, HR, and Marketing data
- Linking operations with reports

✓ GST & Compliance

- Overview of GST and its framework
- Input credit and tax computation
- Invoicing and return filing in ERP
- Rules for intra/inter-state transactions

✓ Business Applications

- ERP for process and performance efficiency
- Tracking sales, finance, and HR data
- Creating reports for business decisions
- ERP insights for management analysis

✓ Practical Learning & Projects

- Hands-on ERP sessions (Tally / Zoho Books)
- Real-time business case exercises
- Functional simulations for all domains

Digital Marketing (30 hours)

Recommended for Marketing & Digital Marketing students

✓ Campaign Management

- Designing and executing paid campaigns
- Audience targeting, bidding, and A/B testing
- Campaign budgeting and ROI tracking
- Analyzing campaign metrics and insights

✓ Advanced SEO & Content Strategy

- SEO audits via SEMrush & Search Console
- Competitor analysis and keyword mapping
- Content optimization for ranking and reach
- Tracking traffic, leads, and conversions

✓ Search Engine Marketing (SEM)

- Basics of Google Ads and PPC
- Keyword planning and bidding
- Writing ad copy and landing pages
- Monitoring performance and conversion

✓ Automation & Email Workflows

- Building automated campaigns and funnels
- Tracking opens, CTRs, and conversions
- Integrating CRM data for targeted outreach

✓ Analytics & Decision Making

- Google Analytic: dashboards & event tracking
- Attribution models and funnel mapping
- Turning analytics into actionable insights
- Reporting performance to stakeholders

✓ Performance & Influencer Marketing

- Running performance ads
- Cost optimization with retargeting & lookalikes
- Collaborating with influencers and tracking ROI

✓ Capstone Project

- Build a campaign for a brand
- Present a dashboard with insights and metrics

AI Tools for Business (10 Hours)

Recommended for Information Technology, Business Analytics, Fiintech Students

✓ Prompt Engineering for Business

- Write clear, structured prompts – (ChatGPT)
- Use roles, tone, formats – (Gemini, Claude)

✓ AI Tools for Marketing

- Generate content & captions – ChatGPT, Canva Magic Studio
- Create social posts & visuals – Simplified AI

✓ AI Tools for Corporate Productivity

- Write emails, memos & reports – ChatGPT, Grammarly, QuillBot
- Draft resumes, JDs & policies – Kickresume, Notion AI
- Interview preparation - Yoodli.ai

✓ AI for Data & Decisions

- Data analysis in spreadsheets – SheetAI / ChatGPT in Excel
- Dashboard creation – Power BI
- Report generation & interpretation – Claude.ai

✓ AI for HR & Operations

- Resume parsing & screening – Teal HQ, ChatGPT
- Employee engagement & feedback forms – Google Forms
- SOPs & HR policy generation – Notion AI

Data Analytics with Power BI (40 Hours)

Recommended for All Groups (Group specific data analysis projects will be included in training)

✓ Introduction to Power BI

- Power BI Components: Desktop, Service, Mobile
- Connecting to Different Data Sources
- Basic Visualizations (Charts, Tables, Cards)
- Filters, Slicers & Drill-through

✓ Power Query & Data Transformations

- Data Cleaning & Shaping
- Merging & Appending Queries
- Conditional Columns & Custom Columns
- Best Practices in Data Preparation

✓ Data Modeling & Relationships

- Understanding Star & Snowflake Schema
- Creating Relationships & Managing Cardinality
- Data Normalization & Denormalization
- Handling Many-to-Many Relationships

✓ DAX Functions & Measures

- Calculated Columns vs Measures
- Aggregation Functions (SUMX, AVERAGEX, COUNTX)
- Time Intelligence Functions
- Advanced DAX (RANKX, VAR, CALCULATE, FILTER)

✓ Creating Interactive Dashboards

- Designing Dashboard Layouts
- Conditional Formatting & Tooltips
- Using Bookmarks, Buttons, and Page Navigation
- Best Practices for User Experience

Python for business (30 Hours)

Recommended for All Groups (Group specific data analysis projects will be included in training)

✓ Introduction to Python

- Introduction to Python and Google Colab / Jupyter
- Variables, data types, lists, and dictionaries
- Writing simple scripts for calculations
- Mini Project: Sales commission calculator

✓ Data Handling with Pandas

- Importing and cleaning data (CSV, Excel, JSON)
- Filtering, grouping, and merging datasets
- Handling missing data and summaries
- Mini Project: Monthly revenue report

✓ Data Visualization & Insights

- Creating charts using Matplotlib and Seaborn
- Visualizing sales trends and KPIs
- Storytelling with visuals for business insights
- Mini Project: Sales performance dashboard

✓ Business Analytics Applications

- Using Pandas & NumPy for business metrics
- Market basket analysis & segmentation basics
- Demand forecasting with regression models
- Mini Project: Predict next month's product demand

✓ Automation & Reporting

- Automating Excel/CSV report generation
- Sending automated emails with summaries
- Generating PDF reports using Python
- Mini Project: Auto-generate weekly summary reports

✓ Capstone Project

- Marketing: Analyze campaign & retention data
- Finance: Build cash flow or expense tracker
- Operations: Optimize inventory or delivery data
- Final Presentation: Code + Visualization Dashboard

✓ Tools & Libraries Covered

- Python (Google Colab / Jupyter Notebook)
- Pandas, NumPy, Matplotlib, Seaborn
- OpenPyXL, CSV, JSON
- scikit-learn (Basic Regression)

Salesforce CRM (40 Hours)

Recommended for all MBA students

✓ Introduction to CRM & Salesforce

- What is CRM
- Salesforce ecosystem
- Navigation & interface

✓ Sales Cloud

- Leads, Contacts, Accounts
- Opportunity cycles
- Pipeline management

✓ Service Cloud

- Cases
- Service lifecycle
- Automation

✓ Reports & Dashboards

- Custom KPIs
- Filters & data structure
- Interactive dashboards

✓ Automation

- Workflows
- Approvals
- Assignment rules

✓ Mini Project

- College-specific / domain-specific CRM
- Report + Dashboard creation

CRM Tools and Email Automation (10 Hours)

Recommended for all MBA students

✓ CRM (Hubspot/Zoho/Similar)

- Navigation & interface
- Contacts, Companies, Deals
- Lead capture forms
- Pipeline stages
- Activity tracking (calls, emails, notes)

✓ Email Tools (Mailerlite or Similar)

- Email campaigns vs transactional emails
- Contact segmentation
- Email templates & personalization
- Open rate, click rate, bounce basics

✓ Email Automation

- Creating marketing emails
- Using free email templates
- Contact lists & filters
- Automated follow-up emails
- Basic workflows (trigger-based)

✓ CRM Reports

- Standard CRM reports
- Sales & marketing dashboards
- Email performance reports
- Interpreting insights for decisions

CAMPUS TO CORPORATE - TECHNICAL SKILLS FOR MCA

Aligned with Karnataka University curriculum

Hands-on job-oriented certification programs

YEAR 2, SEMESTER 2

MCA – Core Technology Tracks Choose ANY ONE Program

Training Program	Training Duration	Best Suited For
Full Stack Development	40 Hours	Frontend Developer / Full StackDeveloper / Web Developer / UI Designer/ Product Designer
Python Programming Fundamentals	20 Hours	Python Developer / Software Developer / AI- ML Developer/ AI ML Analyst / Backend Developer / Automation & Testing
AI & ML - Level 1	40 Hours	Python Developer / Software Developer / AI- ML Developer/ AI ML Analyst / Backend Developer / Automation & Testing
Data Analytics with Power BI	40 Hours	Data Analyst / Business Analyst / Power BI Developer / BI Analyst / Data Visualization Associate / Data Modeler

YEAR 2 – SEMESTER 3

MCA - Advanced Skill + Internship Phase Choose ANY ONE Programs

Training Program	Training Duration	Best Suited For
Advanced Full Stack Development	40 Hours	Frontend Developer / Full StackDeveloper / Web Developer / UI Designer/ Product Designer
AI & ML - Level 2	40 Hours	Python Developer / Software Developer / AI- ML Developer/ AI ML Analyst / Backend Developer / Automation & Testing
Cloud Architecture & DevOps (AWS/Azure)	40 Hours	Cloud Engineer /Devops Engineer /AWS Admin / Cloud Support Engineer / Azure Support

Full Stack Development + UI/UX (40 Hours)

Recommended for All Groups

✓ Modern JavaScript ES6+

- Let/const, arrow functions, spread/rest
- Async JS (Promises, async/await)
- Modular JS structure
- Best practices for clean, maintainable code
- Working with APIs using fetch/axios

✓ React.js

- Understanding SPA architecture
- JSX, components, props
- State & Hooks (useState, useEffect)
- Lists, forms, conditional rendering
- Integrating real APIs
- Project folder structure best practices

✓ Styling & Responsive Design

- CSS Modules
- Tailwind CSS fundamentals
- Utility-first styling
- Responsive layouts (Grid, Flexbox)
- Mobile-first design principles

✓ UI/UX & Design Thinking

- The design thinking process
- User-centered design & empathy mapping
- Typography
- Color palette and contrast
- Layouts & whitespace
- Accessibility principles (WCAG basics)

Python Programming Fundamentals (20 Hours)

Recommended for All Groups

✓ Programming Fundamentals

- Programming concepts basics
- Variables and data types
- Operators and expressions

✓ Control Structures

- Conditional statements
- Looping constructs
- Nested logic
- Control flow practice

✓ Data Structures Basics

- Lists and tuples
- Sets and dictionaries
- Data manipulation
- Basic operations

✓ Functions & Modular Programming

- Function definitions
- Parameters and returns
- Code reusability
- Built-in functions

✓ File Handling & Exceptions

- File read write
- File modes
- Exception handling
- Error debugging

✓ Introduction to Libraries

- Standard library overview
- Math and datetime
- Random module
- Utility functions

✓ Capstone Project

AI / ML (40 Hours)

Recommended for all MCA Students

✓ Introduction to AI / ML & Applications

- AI and ML overview
- AI vs ML concepts
- Real-world applications
- Problem-solving approach

✓ Data Preparation & Visualization

- Data types and sources
- Data preprocessing methods
- Missing value handling
- Data visualization basics

✓ Supervised Learning

- Linear regression models
- Logistic regression models
- Decision tree classification
- KNN algorithm basics
- Model evaluation metrics

✓ Unsupervised Learning

- Clustering concepts overview
- K-Means algorithm
- Dimensionality reduction
- PCA technique basics
- Business use cases

✓ Time Series Forecasting

- Time-based data concepts
- Trend and seasonality
- Moving average models
- Forecasting use cases

✓ Computer Vision Using Pre-trained Models

- Image data fundamentals
- Image processing basics
- Pre-trained models usage
- Transfer learning concept

✓ Generative AI & Prompt Engineering

- Generative AI overview
- ChatGPT use cases
- Prompt design principles
- Creative AI applications

Advanced Data Analytics (40 Hours)

Recommended for all MCA Students

✓ Advanced SQL for Analytics

- Analytical joins for business use cases
- Window functions (ranking, running totals, YoY, MoM)
- Stored procedures for analytics logic
- Views for reusable queries
- Triggers and automation concepts
- Query optimization fundamentals

✓ Business Analytics & Metrics

- Analytics lifecycle (problem to insight)
- KPI design for sales and operations
- Performance metrics and benchmarks
- Translating business questions into SQL queries

✓ Analytics Storytelling & Project

- Turning dashboards into executive insights
- Writing insight summaries & recommendations

✓ BI Tools & Dashboard Engineering

- Connecting Excel and SQL data sources
- Data modeling inside BI tools
- Relationships and schema design
- Advanced DAX for analytics
- Interactive dashboards for stakeholders
- Drill-throughs, slicers, dynamic KPIs
- Dashboard performance best practices

✓ Data Warehousing Concepts

- Enterprise data structures for analytics
- Fact and dimension tables
- Star schema concepts
- Data validation and reconciliation checks

Advanced Full Stack Development (40 Hours)

Recommended for all BCA Students

✓ Full Stack Integration

- Integrating **React** with backend APIs
- API consumption patterns
- Handling async workflows, loading states & errors
- Intro to GraphQL
- Shared data models b/w frontend & backend
- Real-time basics

✓ Modern Backend (Node.js & Express)

- Node.js architecture & Express.js fundamentals
- Building REST APIs (routing, controllers)
- MongoDB + Mongoose integration
- Schema design & CRUD operations
- Authentication: JWT, OAuth (overview)
- Middleware for logging, validation & errors
- Production patterns: rate limiting, API versioning, dotenv

✓ State Management & App Stability

- Syncing frontend state with backend responses
- Error propagation backend → UI
- Auth states, form errors, validation
- Local/session storage for tokens
- Role-based UI (Admin/User basics)

✓ Deployment Essentials

- Environment setup (dev / stage / prod)
- React production build
- Preparing Express backend for deployment
- Full-stack folder structure
- Git branching, merge & PR workflow
- Local deployment simulation (frontend + backend)
- Running backend with nodemon/PM2
- Environment variable linking

✓ Capstone Project

AI & ML Level 2: Applied Machine Learning Essentials (40 Hrs)

Recommended for all BCA Students

✓ Applied Machine Learning

- ML workflow & lifecycle
- Regression, classification models
- Clustering, dimensionality reduction
- Time series forecasting
- Model metrics & evaluation

✓ ML Tools & Foundations

- Streamlit / Flask basics
- GitHub – Code workflow
- Data preprocessing & feature engineering

✓ AI Fundamentals

- What is AI vs ML vs Deep Learning
- LLM basics, embeddings (concept-only)
- Real life applicability of AI

✓ Deployment Essentials

- MLOps basics – Pipelines, Deployment
- Mini-project – ML App

✓ Capstone Project

CLOUD ARCHITECTURE & DEVOPS (AWS/ Azure) (40 Hours)

Recommended for all MCA Students

✓ Cloud Architecture Fundamentals

- Cloud computing principles
- Service models overview
- Cloud architecture design
- Scalability and availability

✓ DevOps Concepts & Practices

- DevOps lifecycle overview
- Development–operations integration
- Automation principles
- Continuous improvement

✓ Version Control & Collaboration

- Git fundamentals
- Repository management
- Branching strategies
- Team collaboration workflows

✓ CI / CD Pipeline Essentials

- CI CD concepts
- Build and release pipelines
- Automation workflows
- GitHub Actions overview

✓ AWS Cloud Services Overview

- AWS global infrastructure
- Core AWS services
- Compute and storage
- Networking fundamentals

✓ Microsoft Azure Overview

- Azure architecture basics
- Core Azure services
- Virtual machines
- Resource management

Campus to Corporate Curriculum

Year 1 - Year 3

BBA, B.COM & BCA

CAMPUS TO CORPORATE - SOFT SKILLS FOR UG STUDENTS

Comprehensive soft skills development programs for all B.Com, BBA & BCA students to ensure:

- ✓ Complete industry and interview readiness
- ✓ Strong professional profile building
- ✓ Effective networking skills
- ✓ Interview and workplace preparedness

YEAR 1, SEMESTER 2

Choose BOTH Programs for complete corporate readiness

Training Program	Training Duration	Best Suited For
Business Communication	20 Hours	All UG Students
Profile Building & Personal Branding	20 Hours	All UG Students

YEAR 3, SEMESTER 5

Choose BOTH Programs for complete corporate readiness

Training Program	Training Duration	Best Suited For
Aptitude & Business Reasoning	20 Hours	All UG Students
Campus to Corporate (Interview skills , GD & Mock Interviews)	20 Hours	All UG Students

B.COM, BBA & BCA Year 1 - Semester 2

Recommended for all Groups

Business Communication (20 hours)

✓ Communication Skills

- All for Business communication
- Write professional emails and memos
- Draft client and internal messages
- Polish tone, grammar, and clarity
- Writing Business Reports

✓ Business Documentation

- Create SOPs, templates & checklists
- Creating JDs & policies
- Draft business plans or proposals
- Data Summaries and Reports
- Generate creative content

✓ Effective Presentation

- Public Speaking
- Body Language & Voice Modulation
- Creating pitch decks

Personal Branding Workshop (20 hours)

✓ Personal Branding

- Profile Building
- ATS compliant resumes
- Tailored job applications
- Optimized LinkedIn Profile
- LinkedIn Networking

B.COM, BBA & BCA Year 3 - Semester 5

Recommended for all Groups

Campus to Corporate (20 hours)

✓ Corporate Readiness

- Interview Preparation Techniques - HR and Technical
- Positive Body Language
- Mock Interview Sessions - HR and Technical
- Group discussions

Aptitude and Logical Reasoning (20 Hours)

✓ Quantitative Aptitude and Logical Reasoning

- Number System, HCF & LCM, Averages
- Profit & Loss, SI & CI, Boats
- Percentages, Areas, Partnership
- Ages, Speed & Distance, Time & Work
- Blood Relations, Coding, Series

CAMPUS TO CORPORATE - TECHNICAL SKILLS FOR B.COM & BBA

Aligned with Chetan College's academic structure — no sessions in Sem 1 & 6, and zero overlap with academic syllabus; focused on applied, domain-specific, analytics-led learning

YEAR 2, SEMESTER 3

B.COM & BBA Choose Any ONE Program

Training Program	Training Duration	Roles Students Can Target
Data Analytics with Excel	30 Hours	Finance / Accounting / Business Analytics / Data Analytics / Marketing / HR / Sales / Logistics / Operations / Supply Chain Roles
Digital Marketing	30 Hours	Marketing / Sales / Business Development / Digital Marketing / Content Creation / Lead Generation / Branding Roles
CRM Tools and Email Automation	10 Hours	Marketing / Sales / Business Development / Customer Support / HR / Customer Account Management / Lead Generation Roles

YEAR 2 – SEMESTER 4

B.COM & BBA Choose ANY ONE Program

Training Program	Training Duration	Roles Students Can Target
Data Analytics with Power Bi	40 Hours	Financial Analyst (FP&A) / Business Analyst / Data Analyst / HR Analytics / Sales Analyst / Supply Chain Analyst / Credit & Risk Analyst / Operations Analyst
Tally or Zoho ERP + GST + Excel	40 Hours	Finance / Accounting / Business Analytics / Data Analytics / Marketing / HR / Sales / Logistics / Operations / Supply Chain Roles
AI Tools for Business	10 Hours	All Roles

Data Analytics with Excel (30 Hours)

Recommended for all Groups

✓ Data Handling & Cleaning

- Importing and structuring business datasets
- Sorting, filtering, and organizing functional data
- Using text, date, and data-cleaning functions
- Handling missing values and duplicates
- Conditional formatting & performance KPIs

✓ Formulas & Functions

- Logical and lookup functions
- Advanced formulas for business decisions
- Applying functions- HR, sales, expenses etc.
- Text and date formulas for reports
- Formulas for multi-criteria analysis

✓ Project: Interactive Dashboard

✓ Data Analysis & Visualization

- PivotTables-HR, Marketing, Finance data etc.
- Advanced Pivot features
- Power Query for transforming datasets
- Building function-specific dashboards (HR analytics, sales trends, cost analysis etc.)
- Visual storytelling and management reports

✓ Automation & Reporting with Macros

- Recording & running macros
- VBA scripting for automation & data processing
- Automating reports, charts, and dashboards
- Creating custom forms & action buttons

Data Analytics with Excel (30 Hours)

Recommended for all Groups

✓ Campaign Management

- Designing and executing paid campaigns
- Audience targeting, bidding, and A/B testing
- Campaign budgeting and ROI tracking
- Analyzing campaign metrics and insights

✓ Advanced SEO & Content Strategy

- SEO audits via SEMrush & Search Console
- Competitor analysis and keyword mapping
- Content optimization for ranking and reach
- Tracking traffic, leads, and conversions

✓ Search Engine Marketing (SEM)

- Basics of Google Ads and PPC
- Keyword planning and bidding
- Writing ad copy and landing pages
- Monitoring performance and conversion

✓ Automation & Email Workflows

- Building automated campaigns and funnels
- Tracking opens, CTRs, and conversions
- Integrating CRM data for targeted outreach

✓ Analytics & Decision Making

- Google Analytic: dashboards & event tracking
- Attribution models and funnel mapping
- Turning analytics into actionable insights
- Reporting performance to stakeholders

✓ Performance & Influencer Marketing

- Running performance ads
- Cost optimization with retargeting & lookalikes
- Collaborating with influencers and tracking ROI

✓ Capstone Project

- Build a campaign for a brand
- Present a dashboard with insights and metrics

B.COM & BBA Year 2 - Semester 3

CRM Tools & Email Automation (10 HOURS)

Recommended for B.Com and BBA Students

✓ CRM Fundamentals

- CRM concepts overview
- Customer lifecycle stages
- Sales and marketing alignment

✓ CRM Tools Overview

- Popular CRM platforms
- Contact management
- Lead tracking basics

✓ Sales & Pipeline Management

- Lead qualification
- Deal stages
- Pipeline tracking

✓ Email Automation Basics

- Email campaign structure
- Audience segmentation
- Automation workflows

✓ CRM & Email Integration

- CRM email sync
- Lead nurturing flows
- Performance tracking

B.COM & BBA Year 2 - Semester 4

CRM Tools & Email Automation (10 HOURS)

Recommended for All Groups (Group specific data analysis projects will be included in training)

✓ Introduction to Power BI

- Power BI Components: Desktop, Service, Mobile
- Connecting to Different Data Sources
- Basic Visualizations (Charts, Tables, Cards)
- Filters, Slicers & Drill-through

✓ Power Query & Data Transformations

- Data Cleaning & Shaping
- Merging & Appending Queries
- Conditional Columns & Custom Columns
- Best Practices in Data Preparation

✓ Data Modeling & Relationships

- Understanding Star & Snowflake Schema
- Creating Relationships & Managing Cardinality
- Data Normalization & Denormalization
- Handling Many-to-Many Relationships

✓ DAX Functions & Measures

- Calculated Columns vs Measures
- Aggregation Functions (SUMX, AVERAGEX, COUNTX)
- Time Intelligence Functions
- Advanced DAX (RANKX, VAR, CALCULATE, FILTER)

✓ Creating Interactive Dashboards

- Designing Dashboard Layouts
- Conditional Formatting & Tooltips
- Using Bookmarks, Buttons, and Page Navigation
- Best Practices for User Experience

ERP Software (Tally / Zoho Books) and GST (40 Hours)

Recommended for Finance, Fintech, Supply Chain and Business Analytics Students

✓ ERP Software & Modules

- Overview of ERP systems and key features
- Setting up organizational structure in ERP
- Managing transactions across functions
- Integration of Finance, HR, and Marketing data
- Linking operations with reports

✓ GST & Compliance

- Overview of GST and its framework
- Input credit and tax computation
- Invoicing and return filing in ERP
- Rules for intra/inter-state transactions

✓ MS Excel Skills for Accounting and Reporting

- Excel Basics for Finance
- Functions like SUM, IF, VLOOKUP
- Formatting and Conditional Formatting
- Data Handling: Filters, Sorting, Data Validation
- Pivot tables for summarizing data
- Charts/graphs for visual representation
- Reporting in Excel

✓ Business Applications

- ERP for process and performance efficiency
- Tracking sales, finance, and HR data
- Creating reports for business decisions
- ERP insights for management analysis

✓ Practical Learning & Projects

- Hands-on ERP sessions (Tally / Zoho Books)
- Real-time business case exercises
- Functional simulations for all domains

AI Tools for Business (10 Hours)

Recommended for Information Technology, Business Analytics, Fintech Students

✓ Prompt Engineering for Business

- Write clear, structured prompts – (ChatGPT)
- Use roles, tone, formats – (Gemini, Claude)

✓ AI Tools for Marketing

- Generate content & captions – ChatGPT, Canva Magic Studio
- Create social posts & visuals – Simplified AI

✓ AI Tools for Corporate Productivity

- Write emails, memos & reports – ChatGPT, Grammarly, QuillBot
- Draft resumes, JDs & policies – Kickresume, Notion AI
- Interview preparation - Yoodli.ai

✓ AI for Data & Decisions

- Data analysis in spreadsheets – SheetAI / ChatGPT in Excel
- Dashboard creation – Power BI
- Report generation & interpretation – Claude.ai

✓ AI for HR & Operations

- Resume parsing & screening – Teal HQ, ChatGPT
- Employee engagement & feedback forms – Google Forms
- SOPs & HR policy generation – Notion AI

CAMPUS TO CORPORATE - TECHNICAL SKILLS FOR BCA

Aligned with Chetan College of Commerce academic structure — no sessions in Sem 1 & 6, and zero overlap with academic syllabus; focused on applied, domain-specific, analytics-led learning

YEAR 2, SEMESTER 3

BCA Choose Any ONE Program

Training Program	Training Duration	Roles Students Can Target
AI ML Level 1: Python Full Stack *	40 Hours	Python Developer / Software Developer / AI-ML Developer/ AI ML Analyst / Backend Developer / Automation & Testing
Full Stack Level 1: Advanced Frontend Development + UI/UX *	30 Hours	Frontend Developer / Full StackDeveloper / Web Developer / UI Designer/ Product Designer
Data Analytics Level 1: Data Analysis & Visualization *	30 Hours	Data Analyst / Business Analyst / Power BI Developer / BI Analyst / Data Visualization Associate / Data Modeler

Note: AI ML, Full Stack & Data Analytics are a 3-level integrated courses. Students opting for these courses must complete all three levels.

YEAR 2 – SEMESTER 4

BCA Choose ANY ONE Program

Training Program	Training Duration	Roles Students Can Target
Applied AI ML Essentials Level 2	40 Hours	Python Developer / Software Developer / AI-ML Developer/ AI ML Analyst / Backend Developer / Automation & Testing
Full Stack Level 2	30 Hours	Frontend Developer / Full StackDeveloper / Web Developer / UI Designer/ Product Designer
Data Analytics Level 2	40 Hours	Data Analyst / Business Analyst / Power BI Developer / BI Analyst / Data Visualization Associate / Data Modeler

AI ML Level 1: Python Full Stack (40 Hours)

Recommended for all BCA Students

✓ Backend Development with Flask/Django

- Routing & templates
- Form handling and validation
- ORM + MySQL integration
- CRUD operations
- Sessions & authentication
- MVC/MVT architecture
- Virtual environments (venv)

✓ Practical Databases for Developers

- Real-world schema design
- MySQL (local server/XAMPP)
- ORM CRUD integration
- MongoDB (local/Atlas optional)

✓ REST API Development + Postman

- REST design
- JSON APIs
- Status codes & error handling
- Testing APIs using Postman
- Connecting API ↔ Frontend

✓ Frontend Essentials

- HTML & CSS
- Java Script + API's
- React Basics

✓ Data Libraries for Real Applications

- NumPy
- Pandas
- Matplotlib

✓ Local Integration & Deployment Simulation

- Production-like local setup
- Linking frontend ↔ backend ↔ database
- Environment variables
- GitHub workflow & documentation
- Frontend hosting via GitHub Pages

✓ Practical Learning & Projects

Full Stack Level 1: Advanced Frontend Development + UI/UX (30 Hours)

Recommended for all BCA Students

✓ Modern JavaScript ES6+

- Let/const, arrow functions, spread/rest
- Async JS (Promises, async/await)
- Modular JS structure
- Best practices for clean, maintainable code
- Working with APIs using fetch/axios

✓ React.js

- Understanding SPA architecture
- JSX, components, props
- State & Hooks (useState, useEffect)
- Lists, forms, conditional rendering
- Integrating real APIs
- Project folder structure best practices

✓ Styling & Responsive Design

- CSS Modules
- Tailwind CSS fundamentals
- Utility-first styling
- Responsive layouts (Grid, Flexbox)
- Mobile-first design principles

✓ UI/UX & Design Thinking

- The design thinking process
- User-centered design & empathy mapping
- Typography
- Color palette and contrast
- Layouts & whitespace
- Accessibility principles (WCAG basics)

BCA Year 2 - Semester 3

Data Analytics Level 1: Data Analysis & Visualization (30 Hours)

Recommended for all BCA Students

✓ Advanced SQL for Analytics

- Complex joins & subqueries
- CTEs and window functions
- Aggregations & rollups
- Query tuning and indexing basics
- Hands-on using MySQL / PostgreSQL

✓ Data Warehousing Concepts

- Star schema, fact vs dimension
- ETL basics
- OLAP vs OLTP
- Real-world warehousing examples

✓ Data Visualization Tools (Tableau / Power BI)

- Connecting to datasets
- Data cleaning inside the tool
- Interactive dashboards
- Calculated fields & DAX (Power BI)
- Drill-downs, slicers, filters

✓ Data Storytelling

- Turning insights into narratives
- Presenting dashboards professionally

✓ Practical Learning & Projects

BCA Year 2 - Semester 4

AI ML Level 2: Applied Machine Learning Essentials (40 Hours)

Recommended for all BCA Students

✓ Applied Machine Learning

- ML workflow & lifecycle
- Regression, classification models
- Clustering, dimensionality reduction
- Time series forecasting
- Model metrics & evaluation

✓ ML Tools & Foundations

- Streamlit / Flask basics
- GitHub – Code workflow
- Data preprocessing & feature engineering

✓ AI Fundamentals

- What is AI vs ML vs Deep Learning
- LLM basics, embeddings (concept-only)
- Real life applicability of AI

✓ Deployment Essentials

- MLOps basics – Pipelines, Deployment
- Mini-project – ML App

✓ Capstone Project

Full Stack Level 2 : Advanced Backend & Full Stack Integration- (40 Hours)

Recommended for all BCA Students

✓ Full Stack Integration

- Integrating React with backend APIs
- API consumption patterns
- Handling async workflows, loading states & errors
- Intro to GraphQL
- Shared data models b/w frontend & backend
- Real-time basics

✓ Modern Backend (Node.js & Express)

- Node.js architecture & Express.js fundamentals
- Building REST APIs (routing, controllers)
- MongoDB + Mongoose integration
- Schema design & CRUD operations
- Authentication: JWT, OAuth (overview)
- Middleware for logging, validation & errors
- Production patterns: rate limiting, API versioning, dotenv

✓ State Management & App Stability

- Syncing frontend state with backend responses
- Error propagation backend → UI
- Auth states, form errors, validation
- Local/session storage for tokens
- Role-based UI (Admin/User basics)

✓ Deployment Essentials

- Environment setup (dev / stage / prod)
- React production build
- Preparing Express backend for deployment
- Full-stack folder structure
- Git branching, merge & PR workflow
- Local deployment simulation (frontend + backend)
- Running backend with nodemon/PM2
- Environment variable linking

✓ Capstone Project

Data Analytics Level 2: Programming & Big Data - (40 Hours)

Recommended for all BCA Students

✓ Python for Data Analysis

- Data manipulation using Pandas & NumPy
- Cleaning, filtering, grouping, merging datasets
- Basic statistics & exploratory data analysis (EDA)
- Intro to SciPy for statistical tests

✓ Machine Learning with Scikit-learn

- Train/test split & model workflow
- Simple models: Linear & Logistic Regression
- Model evaluation: accuracy, F1-score, MAE

✓ Big Data Processing with PySpark

- Spark architecture in simple terms
- Working with RDDs & DataFrames
- Transformations & actions (map, filter, reduce)
- Building simple ETL/data pipelines
- Using Spark SQL for structured data

✓ Capstone Project

CAMPUS TO CORPORATE - TECHNICAL SKILLS FOR BCA

Aligned with Chetan College of Commerce academic structure — no sessions in Sem 1 & 6, and zero overlap with academic syllabus; focused on applied, domain-specific, analytics-led learning

YEAR 3, SEMESTER 5

BCA Choose Any ONE Program

Training Program	Training Duration	Roles Students Can Target
Applied AI ML Essentials Level 3	40 Hours	Python Developer / Software Developer / AI-ML Developer/ AI ML Analyst / Backend Developer / Automation & Testing
Full Stack Level 3	30 Hours	Frontend Developer / Full StackDeveloper / Web Developer / UI Designer/ Product Designer
Data Analytics Level 3	40 Hours	Data Analyst / Business Analyst / Power BI Developer / BI Analyst / Data Visualization Associate / Data Modeler

AI ML Level 3 — Deep Learning + Generative AI & Cloud (40 Hours)

Recommended for all BCA Students

✓ Deep Learning Fundamentals

- Neural networks & backpropagation
- CNN for image tasks
- RNN & LSTM models
- Transfer learning – pretrained models

✓ GenAI Tools

- GenAI overview & latest trends
- Essential GenAI tools
- Prompt engineering basics
- Real-world GenAI use cases

✓ Cloud ML

- AWS SageMaker / Vertex AI – Basics
- Cloud deployment workflows
- GitHub – Versioning, Collaboration, Portfolio

✓ Capstone Project

Full Stack Level - 3: Mobile App Development & Cloud Deployment (30 Hours)

Recommended for all BCA Students

✓ Mobile App Development

- React Native basics: JSX, components, styling, navigation
- API consumption & Firebase basics
- Build & deploy basic mobile app

✓ Industry Skills

- Agile basics & project planning

✓ Capstone Project

✓ Cloud, DevOps & Deployment Essentials

- Hosting (Vercel, Netlify, Heroku free tiers)
- CI/CD introduction & GitHub Actions
- Version control with Git
- Cloud basics (AWS/GCP/Azure overview)

Data Analytics Level - 3

Recommended for all BCA Students

✓ Cloud ML Platforms (AWS / Azure / GCP)

- Build & train ML models using cloud-managed services
- AutoML, model tuning & cloud notebooks
- Deploy models as scalable endpoints
- Monitor performance & manage ML workflows

✓ Databricks for Applied Data Science

- Notebook-based collaborative data analysis
- Working with Delta Lake & unified data platforms
- Big data processing using DataFrames
- Team collaboration, versioning & reproducibility

✓ Cloud + Big Data Integration

- Connecting cloud ML services to data sources (Blob / S3)
- Basic ETL workflows on cloud
- Running ML pipelines on scalable compute

✓ Capstone Project
