

SESSION 2 & 3 | 4 HOURS

OPPORTUNITY IDENTIFICATION

Spot today. Solve tomorrow. Build the future.

-  **Identify Market Gaps**
See what others miss.
-  **Solve Real Problems**
Turn challenges into solutions.
-  **AI for Idea Generation**
Use AI tools to brainstorm better.
-  **Evaluate Opportunities**
Validate. Prioritize. Pursue.
-  **Create Impact & Value**
Innovate today. Lead tomorrow.

-  **IDEA GENERATION**
Unlock possibilities with AI
-  **MARKET INSIGHTS**
Understand trends and opportunities
-  **SMART DECISIONS**
Evaluate and choose the best path
-  **CAREER GROWTH**
Build skills. Build future. Build you.

“ Opportunities don’t happen.
You create them.”

WHERE DO BUSINESS OPPORTUNITIES COME FROM?

— Opportunities are **everywhere**. You just need the **right mindset** to spot them.

“ The best entrepreneurs don’t wait for opportunities. They find them, create them and turn them into impact.

SOURCES OF OPPORTUNITIES

Problems people face

Environmental challenges

Changing lifestyles

Demographic changes

New technologies

Customer dissatisfaction

Government policies

Global trends

FROM PROBLEM TO OPPORTUNITY

PROBLEM

OPPORTUNITY

Long queues and waiting time

Online booking and queue management

PROBLEM

OPPORTUNITY

Plastic pollution harming the planet

Eco-friendly products and packaging

PROBLEM

OPPORTUNITY

Expensive and inaccessible education

Affordable and accessible EdTech

PROBLEM

OPPORTUNITY

Traffic congestion and time loss

Ride-sharing and carpooling

PROBLEM

OPPORTUNITY

Unused rooftops in cities

Solar installations and green energy

Great opportunities come from **paying attention** to the world around you and caring enough to **solve real problems**.

MARKET GAPS

A Market Gap is something customers want but **cannot easily obtain**.

“ The biggest opportunities lie in the gaps between what people want and what’s available.

COMMON MARKET GAPS

Existing products are too expensive

Products are poor quality

Slow delivery

Complicated user experience

Lack of personalization

Limited availability

Poor customer service

Outdated solutions

ACTIVITY

Find five businesses around your college that could be improved.

#	BUSINESS / SERVICE	WHAT CAN BE IMPROVED?

PROBLEMS BECOME BUSINESSES

Great businesses start by solving **real problems** for real people.

1. OBSERVE

Notice problems around you.

2. UNDERSTAND

Dig deeper.
Find the root cause.

3. SOLVE

Create a solution that works.

4. CREATE VALUE

Bring value to people's lives.

5. EARN REVENUE

Build a sustainable business.

Find a problem worth solving, and the business will take care of itself.

EXAMPLES: FROM PROBLEM TO BUSINESS

PROBLEM	INSIGHT	SOLUTION / BUSINESS IDEA	WHO BENEFITS?
 Parents worry about children's careers	 Lack of proper career guidance and awareness	 Career Guidance & Counseling Platform	 Students, Parents, Schools
 People forget to take their medicines	 No simple reminder system	 Medicine Reminder Mobile App	 Patients, Elderly, Families
 Small shops lack digital presence	 Lack of digital skills and online visibility	 Digital Marketing Services for Local Businesses	 Small Business Owners, Local Economy

EXERCISE

Write down 20 problems you noticed this week.
Big or small – every problem is an opportunity in disguise!

THE DESIGN THINKING APPROACH

A human-centred approach to identify the **right problem** and build the **right solution**.

“Design thinking is not just for designers. It’s a mindset for solving real-world problems in creative and practical ways.”

FIVE STAGES. ENDLESS POSSIBILITIES.

HOW IT WORKS: A SIMPLE EXAMPLE – “SMART WATER BOTTLE”

EMPATHIZE

Students forget to drink water and don't track their daily intake.

DEFINE

The real problem is lack of reminders and tracking of water intake.

IDEATE

Ideas: Reminder alerts, tracking app, smart bottle with LED, etc.

PROTOTYPE

Build a simple prototype of the smart bottle.

TEST

Test with users, collect feedback and improve the design.

MINI ACTIVITY

Redesign the classroom water bottle!

Step 1 – Empathize

Talk to 3 classmates. What problems do they face with their water bottles?

Step 2 – Define

Write the main problem in one clear sentence.

Step 3 – Ideate

List at least 5 ideas to solve the problem.

Step 4 – Prototype

Draw or describe your best idea.

Step 5 – Test

How will you test it? Who will you ask for feedback?

Great ideas come from understanding people deeply and experimenting quickly. Design thinking helps you do both.

AI FOR IDEA GENERATION

Use AI tools to expand your thinking,
explore possibilities and **spark innovative ideas**.

“ AI won't replace your creativity,
but it will supercharge your
imagination and save you time.

POWERFUL AI USE CASES FOR ENTREPRENEURS

Brainstorm Ideas

Generate a wide range
of business ideas

Trend Analysis

Identify emerging trends
and future opportunities

Customer Insights

Understand customer pain points,
needs and preferences

Market Research

Analyze market size, demand,
competition and gaps

Business Naming

Get creative name
suggestions

Logo & Branding

Generate logo ideas
and brand concepts

Business Models

Explore and compare
different business models

Competitor Analysis

Understand competitors
and positioning

SAMPLE AI PROMPTS TO GET YOU STARTED

- 01 Suggest 20 profitable business ideas in Hyderabad for college students with an investment below ₹2 lakhs.
- 02 Identify emerging business opportunities in agriculture using AI and technology.
- 03 Give me business ideas solving problems faced by elderly people in urban areas.
- 04 What are some low-cost, high-impact business ideas that promote sustainability?
- 05 Suggest unique business ideas for pet owners in India.

ACTIVITY

Use AI to generate
as many ideas as you can!

30
IDEAS

Challenge:

Generate at least **30** business ideas
using any AI tool of your choice.

POPULAR AI TOOLS YOU CAN USE

EVALUATING BUSINESS OPPORTUNITIES

Not every idea is a good business.

Evaluate your ideas **objectively** before investing **time** and **resources**.

“ A good idea is exciting.
A great idea is viable,
desirable and scalable.

EVALUATION TIPS

Be honest

Don't rate based on excitement alone.

Use real data

Validate assumptions where possible.

Compare fairly

Evaluate all ideas on the same scale.

Get feedback

Talk to potential customers and mentors.

Think long term

Consider scalability and sustainability.

Re-evaluate

Ideas evolve with new insights.

ACTIVITY

Evaluate your top 3 ideas using the scorecard.
Identify your strongest opportunity.

IDEA SCORECARD						
Rate each idea on a scale of 1 (Low) to 5 (High) for every criterion.						
#	EVALUATION CRITERIA	WHY IT MATTERS	IDEA 1 SCORE	IDEA 2 SCORE	IDEA 3 SCORE	WEIGHT (%)
1	 Solves a real problem	Addresses a genuine pain point.	☐	☐	☐	15%
2	 Market demand	There are enough people who need this.	☐	☐	☐	15%
3	 Personal interest	You are passionate about working on it.	☐	☐	☐	10%
4	 Skills available	You (or your team) have the skills to execute.	☐	☐	☐	10%
5	 Investment required	Startup cost is affordable and manageable.	☐	☐	☐	10%
6	 Profit potential	Potential to generate good returns.	☐	☐	☐	10%
7	 Scalability	Can the business grow beyond initial stage?	☐	☐	☐	10%
8	 Competition	Level of competition in the market.	☐	☐	☐	5%
9	 Social impact	Creates positive impact on people and environment.	☐	☐	☐	5%
TOTAL SCORE			/ 100	/ 100	/ 100	100%

The idea with the highest total score is your strongest opportunity!

Ideas are easy. Evaluation is what separates **dreamers** from **doers**.

OPPORTUNITY SCREENING MATRIX

Use this matrix to quickly assess your ideas based on **Market Demand** and **Competition Level**.

The goal is not to find “no competition”, but to find the **right balance** of demand and competition where you can win.

HOW TO USE

- 1 List your ideas.
- 2 Rate each idea for Market Demand (Low/High) and Competition (Low/High).
- 3 Place each idea in the matrix.
- 4 Focus on ideas in the green zone first, then differentiate if in the yellow zone.

ACTIVITY

Place your top 10 ideas in the matrix. Identify your top 3 opportunities from the ideal zones.

		MARKET DEMAND	
		LOW DEMAND	HIGH DEMAND
COMPETITION LEVEL	HIGH COMPETITION	AVOID ZONE Low Demand / High Competition • Low interest from customers • Many competitors fighting for a small market • High risk, low returns Strategy: Avoid or rethink the idea.	DIFFERENTIATE ZONE High Demand / High Competition • Large market opportunity • Many competitors already present • You must differentiate and innovate to stand out Strategy: Find your unique edge and create strong differentiation.
	LOW COMPETITION	EXPLORE ZONE Low Demand / Low Competition • Less competition, but market may be small • Opportunity to create demand • Validate before investing heavily Strategy: Explore, validate and build demand if potential exists.	EXCELLENT ZONE High Demand / Low Competition • Large market with fewer competitors • Great opportunity to build and grow • Higher chances of success Strategy: Go for it! Prioritize and move fast.

Great opportunities exist where **strong demand** meets **low competition** and you have the **ability to solve it better**.

GROUP ACTIVITY

THE 100 PROBLEMS CHALLENGE

Great **opportunities** hide in everyday **problems**.
Let's find them, refine them and turn them into impactful **businesses**!

TIPS FOR GREAT IDEAS

Focus on real problems that people care about.

Think about your target user and their needs.

Look for problems others ignore or overlook.

Combine problems, trends and technologies.

Think local. Solve big. Impact can be global!

REMEMBER

Every big business started as a simple idea to solve a problem.
Your idea can be next!

1

WRITE 100 PROBLEMS

Individually or as a team, write down 100 everyday problems people face.

20 MINUTES

2

PICK THE BEST 20

Discuss and select the 20 most interesting, relevant and impactful problems.

15 MINUTES

3

TURN INTO BUSINESS IDEAS

Convert each problem into a business idea that can solve it.

30 MINUTES

4

CHOOSE YOUR TOP 3

Evaluate all ideas and choose your top 3 opportunities.

20 MINUTES

PRESENT TO THE CLASS!

Each team gets 3 minutes to present their Top 3 Ideas.
Share. Get Feedback. Improve.

Collaboration sparks creativity. Curiosity finds problems. Action creates **opportunities**.
Work together. Think big. Build the future!

FROM IDEAS TO OPPORTUNITIES

A great **opportunity** is where **Impact**, **Demand** and **Feasibility** come together.

“ Ideas are many.
Opportunities are few.
Execution makes them real.”

OPPORTUNITY CHECKLIST

	Does it solve a problem that people truly care about?	☐	YES / NO
	Is there enough demand and potential customers?	☐	YES / NO
	Can we realistically build and deliver the solution?	☐	YES / NO
	Can it create sustainable value / revenue?	☐	YES / NO
	Does it have the potential to grow and create a bigger impact?	☐	YES / NO

✓ If you answered YES to most of these, you might have a strong opportunity!

THE 3 PILLARS OF A STRONG OPPORTUNITY

1. IMPACT

Does it solve a real problem?
Will it make a meaningful difference?

✓ Go where the need is real.

2. DEMAND

Will people pay for it?
Is there a large enough market?

✓ Go where people want it.

3. FEASIBILITY

Can we build it?
Do we have the skills, resources and time?

✓ Go where you can win.

STRONG OPPORTUNITY

High Impact
Strong Demand
Achievable for You

ACTIVITY

Revisit your Top 3 Ideas from the last activity.
Use the checklist to evaluate each idea.
Discuss as a team and select your strongest opportunity.

REFLECTION

- Why did you choose this opportunity?
- What makes it meaningful to you?
- What change do you want to create with it?

TIPS TO REMEMBER

Focus > Idea

The right opportunity is more important than a perfect idea.

Start Small, Think Big

Begin with what you can do now. Grow from there.

Validate Early

Talk to real people.
Test your assumptions.

Stay Flexible

Be ready to adapt as you learn more.

Take Action

Opportunities are captured, not found.

“ The best way to predict the future is to create it. ”

Opportunities don't wait. Recognize them. Refine them. Act on them.
You don't need more ideas. You need the right opportunity and the courage to build it.
